## An Ominous Beginning...

Imagine waking up one day in a place you've never been to before and no longer knowing who you are. As it happens, this is Grandy's experience after he stepped out of a fog bank in the middle of a forest one day and realised that he had lost all his memories. The only thing he can still remember is the name Libra, and that the dog standing in front of him somehow belongs to him too. But what to do now?

Together with his dog, who goes by the name Julie, Grandy first tries to find out where he is. Before long, he meets Dankwart, an elderly gentleman living in a straw hut, but who otherwise has quite a distinguished and polite demeanor. But this is nothing compared to the stories he has to tell! Apparently, the region our plucky hero finds himself in is called the Eastern Marches, a place on the very eastern edge of the Duchy of Falkenburg. The county has been ruled for 20 years by a fiend called Wahnfried, who once seized land and crown by force. And if the rumours are true, Dankwart is no other than the former duke himself, who had been robbed of his power by Wahnfried many years ago and has been living in exile here in the Marches ever since. Furthermore, Dankwart states to have recently met the mysterious Libra, who, according to his claims, seems to share the same fate as Grandy. But can such an outrageous story really be true?

Join Grandy on his search for Libra and his past and help him free the lands from a cruel tyrant!

## Of Heroes and Villains

Can it really be him? The saviour I knew all my life would guide us out of oppression? To me he seems uncouth and a little simple-minded. He makes bad jokes about everything and everyone. Yet I feel it must be him... and that my life has purpose again. Perhaps I should put aside my reservations and trust in the Gracious Father. The next few days will bring about the truth.

Lazalantin, Freedom Fighter of Düsterburg

Uh, I hope this stays between us. I don't want to say anything bad about Libra, but honestly... She can be a real pain. You see, you're trying to keep the troupe at least somewhat motivated, and then the lady comes along again and tears everyone a collective new one. That doesn't necessarily make it easier. She's sweet and cute and can also be quite nice sometimes, but she's still a diva... a lovable diva, mind you...

Grandy, Husband

A laughable subject! I still wonder how he was ever able to even remotely govern his province. The bloke lived in a world somewhere between some incomprehensible formulas and pink clouds. Simply ludicrous how easy it was for me to gain access to his private chambers. Well, I brought him down to earth, and I also set his pretty wife straight.

Wahnfried, Duke of Düsterburg

The patient lives in a displaced reality in which his sister, who has been missing since childhood, is still alive and married. In order not to shatter from this contradiction, he has completely withdrawn into his own world, which corresponds to that of a ten-year-old boy. He is extremely shy and does not speak to anyone. In his free time he plays music. A few months ago, he even started composing his own pieces.

Alfons Einbein, Director of the Düsterburg Sanatorium

He is an arrogant sadist and that's what makes him vulnerable. Years ago, he left me in the Icy Wastelands, devoid of all hope, only to see me suffer. He will have to pay for this folly. He thinks his tyranny has made the people of Falkenburg give in, but here too he is mistaken. Resistance is festering everywhere, but in his complacency, he overlooks it.

Dankwart Dengelbrack, hermit from the Eastern Marches

Just thinking about him gives me goosebumps. I only caught a glimpse of him, but that was enough. He was all wrapped up in a robe and kept to the background, but I could still see his glowing eyes. And there was something very demonic about him in other ways too. I hope my master succeeds with his plan. This man scares me more than all the horror stories about Wahnfried, the dark Duke of Düsterburg, put together.

Derleth, loyal servant of the von Junzt family

# Traveller's Map

## **1 – Falkenburg (Castle)**

The Falkenburg, built by the first Duke Falk von Dengelbrack, towers high above Ravenstone County. Duke Dankwart governs the region from here. In contrast to his warmongering forefathers, the current duke has devoted himself exclusively to the pursuit of knowledge. In his youth he studied at the famous Königsberg Academy of Sciences.

## **2 – Country Inn**

In the middle of the Ravenstone County, which includes the entire area north of the village of Falkenburg up to the ducal stronghold, lies the traditional inn "The Squeaking Boar". It is a central hub for the many traders who travel the Falkenburg-Königsberg route, as well as for the young lads and lasses of the region who celebrate wild parties here, well hidden from their parent's watchful eyes.

## **3 – Abandoned Plateau**

To the northwest of Falkenburg, a lonely plateau towers over the land. Many ages ago, one of the county's dukes had massive vaults built to bury him and his family. It is said that ever since no soul had set foot on the plateau, yet rumour has it that there is a secret passage leading directly to unbelievable treasures hidden in the tombs. However, the stories further describe a watchful guardian and dangerous traps, which would also explain why so far no one is known to have successfully scaled the cliffs.

## **4 – Castle Ravenstone**

The fortress Ravenstone is said to be the oldest building in the region. It is yet unknown how or by whom it was built, but many legends draw a connection to Malthur the Impaler who once supposedly dwelled in there. Currently however, the castle is inhabited by Knight Roland and his entourage, who governs the county in service of Duke Dankwart. Word has it that Knight Roland recently asked for a rich merchant's daughter's hand in marriage. These rumours are as of yet unconfirmed, but perhaps the walls of the old stronghold will soon be lit up by the lights of the wedding festivities.

## **5 – Falkenburg (Town)**

The town of Falkenburg is the duchy's capital, even though it cannot compete with the trade city of Königsberg with regards to size, splendour and cosmopolitanism. So far however the many dukes forewent the opportunity to move the seat of government into the big city at the gulf, most likely because governing is easier far away from that powerful metropolis.

## 6 – The Eastern Marches

Up until about one hundred years ago, the Eastern Marches profited of the trade between Falkenburg and the dwarves of the Icy Wastelands. But after the deliveries stopped, most people decided to leave the region. These days, the duchy's easternmost province is sparsely populated. Wolves have migrated from the mountains into the vales below and prowl the misty forests. Rumours are growing about ghosts, dark cults and a demonically possessed nature, but it is anyone's guess whether these stories have any merit to them or just came to be by the imagination of the local country bumpkins.

## 7 – Icy Wastelands

The Icy Wastelands are a hostile region a day's journey to the south of the Eastern Marches. The path there is arduous since it leads steadily uphill, and even trained climbers tend to shy away from the trip. A long time ago, a clan of proud dwarves settled the area and dug deep into the mountains in search of gold. But the little folk has fallen silent many ages ago. Sporadically, a massive Wyvern was reportedly seen circling the peaks. Could this explain why the once lucrative gold trade has come to a sudden end?

# Frequently Asked Enquiries

## **The text is barely readable! What do I do?**

Open the "Font" folder in the main directory of this game. Install the two available fonts in there (RM2000.fon and RMG2000.fon) by double-clicking them and selecting "Install".

## **What's the keyboard layout?**

Use the Arrow Keys for navigation, Space Bar to confirm and Escape to cancel or call the menu. See also the final paragraph for all key bindings.
